

ENVIBRA

TEST AND MEASUREMENT

ENVIBRA supplies test and measurement equipment for data acquisition and real-time analysis of dynamic phenomena as well as motion and vibration simulation. We support any industry or field of academics, where there is demand for motion and vibration test and measurement.

We cooperate exclusively with well recognized brands in the industry such as: Endevco, Unholtz Dickie, TEAM, DTS, DEWESoft, Acutronic, MetroLaser.

Our offer includes:

- pressure and acceleration transducers,
- inclinometers, inertial sensors,
- laser vibrometers,
- distributed measurement systems,
- motion simulation from 1x to 5x axis,
- dynamic signal analyzers and recorders,
- mobile and stationary measurement cards,
- signal amplifiers and conditioners,
- single and multiaxis vibration test equipment.
