“Journal of Measurements in Engineering” (JME) is a quarterly journal. The first issue of JME will be published until the end of March 2013.

JME is open for submissions. All queries should be addressed to: k.ragulskis@jve.lt. Potential authors are recommended to visit www.jve.lt, where they can find all necessary information about the manuscript preparation and submission.

JME publishes articles describing contributions in the general field of measurements in/and engineering applications.

JME welcomes theoretical papers aimed at winning further understanding of fundamentals of measurements and associated technologies, including, but not restricted to, general principles of measurement and instrumentation, sensors and systems modelling, data acquisition, processing and evaluation.

JME covers practical aspects and applications with contributions on measurement technology and engineering applications, including, but not restricted to, non-destructive measurement of vibrations, thermal, acoustic, optical and laser based measurement of engineering systems in micro and macro scales.
